

THE STRONG POINTS OF THE HEALTH BOUNCE POD™

A GEORGE NISSEN'S ORIGINAL
Inventor of the Trampoline

The unique open C-shape of the center hoop allows for easy access both on and off. It has a soft grip and provides you with stability, which means balance and security to exercise with confidence.

Assorted sets of springs to provide a fit and secure support

Padded C-shape handle for a secure and comfortable grip.

Foam external padding for extreme comfort and complete protection and insulation of the jumping springs.

Front padded handle bars, for easier access both on and off, as well as comfortable grip while exercising.

U-shape legs made of treated metal tube and fitted with anti-slip and protective feet. Provide extra ground support for a better stability.

Foldable frame arches: a unique design providing a perfect balance and stability.

High quality bouncing mat of professional standards. Suitable for movements and easy to clean.

Fitted with 20 superior quality springs, to provide a perfect mass absorption and balance bounce.

BPod™
XL version!
• ACCOMMODATE BODY WEIGHTS OVER 150 KG!
• SUITABLE FOR WHEELCHAIR USERS!

The arches can be folded quickly for easy storage.
